

+Living presentation

In cooperation with Arch. Halvorsen & Reine we have designed a special concept (+Living or +BO).

The module-based thinking in combination with production of elements fits a large type of flats.

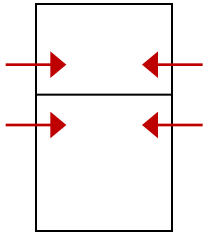

+Living

Module A

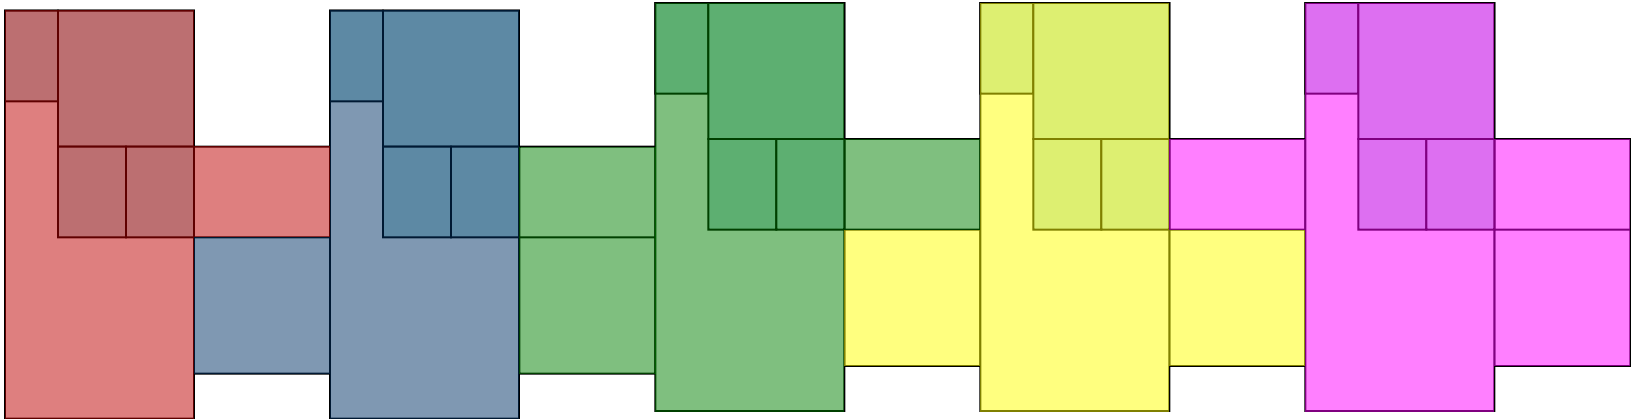

Is the main basis of the flat. It contains an entrance, bedroom, bath, living room and storage room. Direct admittance to the kitchen. Normal size 50 m². It can be made smaller if necessary.

Module B

Is the elastic area which can be added to the basis module. This will enlarge the flat with one or more rooms from 7 to 36 m², and gives various types and sizes within 50-86 m².

+Living

A+B - Module

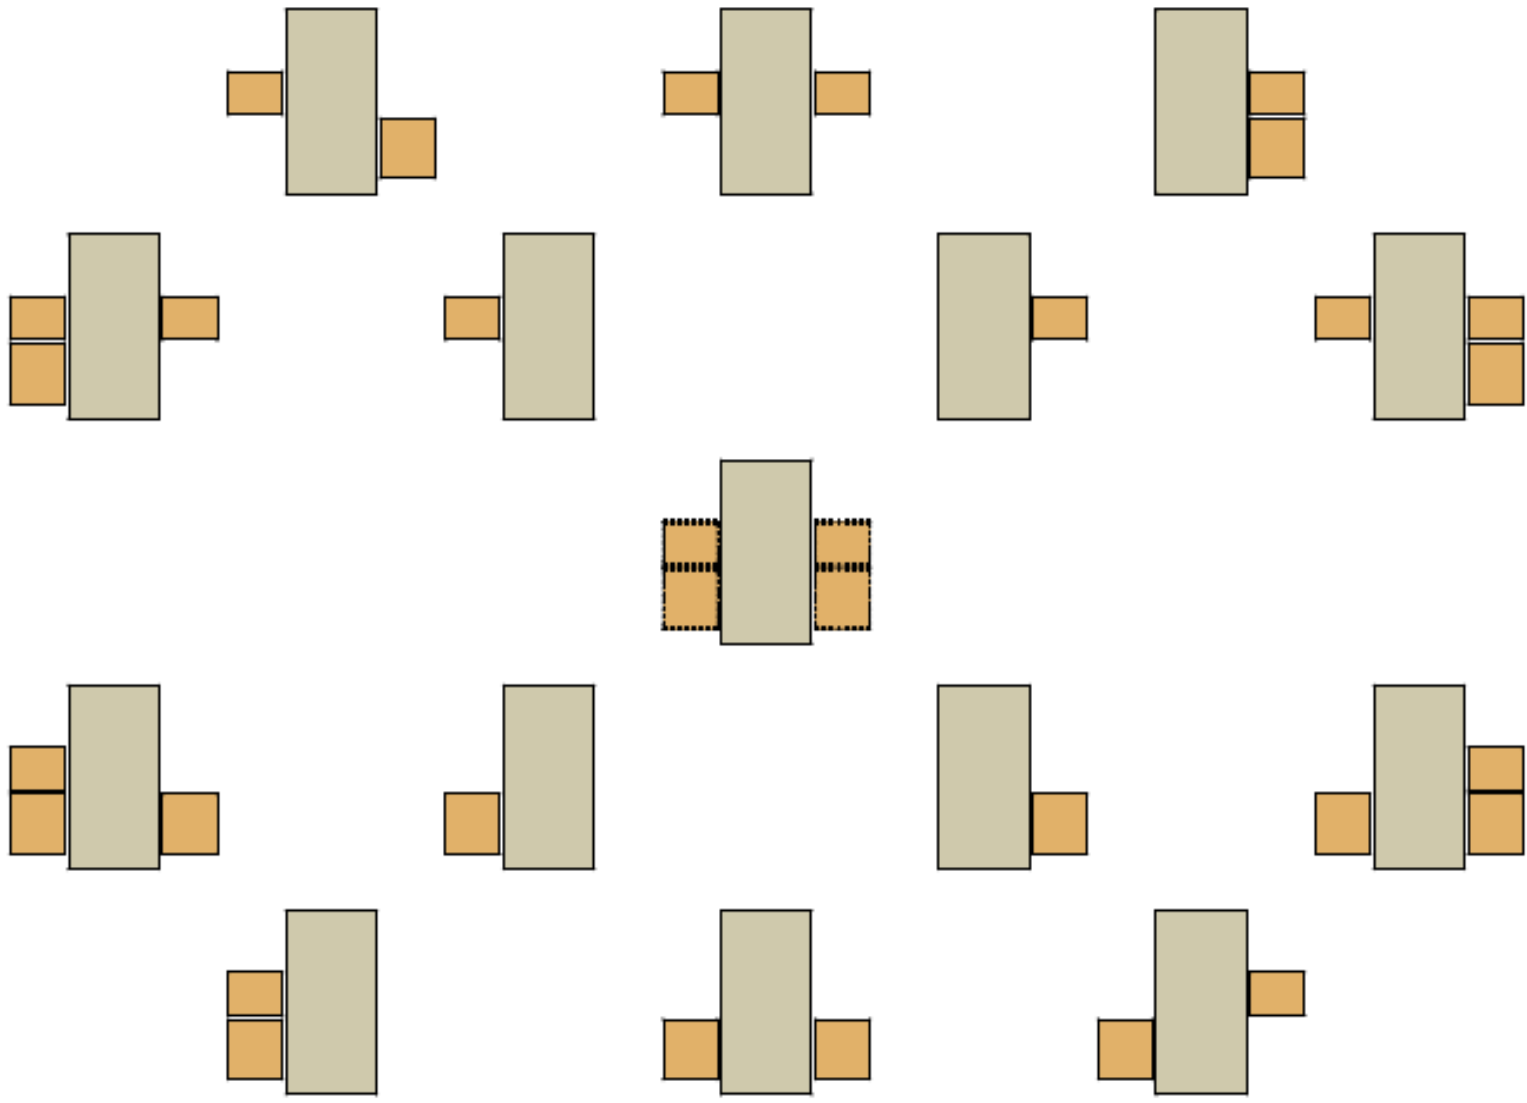

By combining the A and B-modules we achieve different types of apartments. The spaces between the flats is filled up with entrance area and balconies. This gives us a various type of architectural expression.
